

Equipping **Caregivers** with **Confidence**

CareBridge
ENGLISH

The **Language** of Care,
made **simple!**

CareBridge English is a 80-hour integrated curriculum that supports first-year healthcare students in developing core English language proficiency for academic and clinical settings. This program is a structured, workbook-first English course focused on clinical communication and professional language use. It bridges the gap between classroom learning and hospital communication—building confidence in grammar, vocabulary, and interaction relevant to real-world healthcare environments.

Key Features

- 80 hours of interactive learning designed to build English proficiency with clinical relevance
- Integrated learning model featuring high-quality learning videos and responsive classroom activities
- Structured workbook with QR codes linking to video lessons for easy review and reinforcement
- Instructional design inspired by IELTS and OET frameworks to ensure practical and global relevance
- Strong emphasis on healthcare vocabulary, contextualized communication skills, hospital documentation, and peer interaction
- Self-learning resources like videos, notes and review games provided for students to revisit concepts and practice independently

CareBridge English offers two flexible delivery modes to suit institutional needs and learner preferences:

Classroom-Facilitated Mode : In this delivery mode, teachers or facilitators lead students through each lesson using the structured workbook, integrated videos, and guided activities. This is followed by assignments to be completed on the workbook with access to learning resources through a dedicated portal.

Self-Paced Learning Mode : This mode allows students to work independently through the workbook, accessing the learning resources on the portal via QR codes and completing self-assessment tasks at their own pace.

Equipping **Caregivers** with **Confidence**

The CareBridge English program consists of eight thoughtfully designed units, each spanning 10 hours and focusing on practical English skills for nursing students.

Unit 1: Foundations of Communication - Build essential vocabulary and grammar for everyday hospital interactions, including greetings, introductions, and polite requests.

Unit 2: Patient Interaction - Learn to ask and answer questions, give instructions, and use reassuring language while interacting with patients.

Unit 3: Understanding & Giving Information - Develop listening and speaking skills for understanding patient concerns and providing clear explanations of procedures or care routines.

Unit 4: Describing People & Conditions - Use appropriate adjectives, body parts, and medical vocabulary to describe patients' physical appearance, symptoms, and conditions.

Unit 5: Time, Schedules & Routines - Practice using days, times, and frequency expressions to talk about appointments, medication timings, and shift responsibilities.

Unit 6: At the Nurse's Station - Engage in workplace communication such as note-taking, writing instructions, and using polite, formal register with peers and seniors.

Unit 7: Emergencies & Protocols - Understand and use emergency-related vocabulary and sentence patterns to report incidents and respond to urgent situations.

Unit 8: Revision & Real-Life Application - Reinforce key language through case studies, dialogues, and role-plays that simulate real-life clinical scenarios.

Equipping **Caregivers** with **Confidence**

Equipping Caregivers with Confidence

Unit 1

Introductions & Basics

Grammar Focus

In this unit, you'll learn how to talk about yourself and others with the '*be*' verbs (am, is, are) in both questions and answers. We'll explore the building blocks of *sentences*—like *nouns*, *pronouns*, and *articles*—and see how to make your sentences more colourful with *adjectives*. You'll also discover how *prepositions* help you talk about when and where things happen. By the end, you'll be able to put these pieces together to make clear, confident sentences.

Vocabulary Focus

Word Categories : Medical Professions, Simple Verbs, Family Members, Weather Words, Antonyms, Basic Feelings & Emotions, Academic Words, Age Words

Trace & Learn : Days, Months, Colours, Basic Shapes, Numbers, Fruits, Vegetables, Hospital things, Basic time words, Classroom objects, Animals, Names of illnesses, Body systems & organs

Scan QR code for Unit 1 Resources

Scio^oCare

Activity #1 : Types of pronouns

Complete the table by filling in the missing pronouns

Subject	Object	Possessive
I		
you		
		his
she		
it		
	us	
they

Activity #3 : Antonyms practice

Write the opposites of these adjectives

polite × _____	tall × _____	hungry × _____	thick × _____
soft × _____	clean × _____	tired × _____	wide × _____
noisy × _____	healthy × _____	empty × _____	day × _____
happy × _____	flat × _____	cheap × _____	bright × _____
early × _____	strong × _____	heavy × _____	rough × _____

Activity #4 : Reading practice

Read the following paragraph and answer the questions in one word.

This is a small village clinic. It has clean white walls and bright lights. The waiting room is quiet and neat. There are a few green chairs for the patients. A kind receptionist sits behind a wooden desk. The doctor's room is next to the waiting area. It has a big table, a soft bed for patients, and many sharp instruments. The clinic smells fresh and is always kept clean. People feel safe and comfortable here.

- What color are the clinic walls? → _____
What kind of chairs are in the waiting room? → _____
Describe the receptionist. (One adjective) → _____
What does the clinic smell like? → _____
Describe the clinic in two words. → _____, _____

caresteps

Foundational **Soft skills**
for **Healthcare** Freshers

CareSteps is a foundational life and communication skills program designed especially for first-year nursing students. Recognizing the challenges students face when transitioning into professional education, CareSteps equips them with essential skills in self-management, emotional resilience, communication, and learning strategies. The program fosters confidence, personal effectiveness, and college readiness—creating a strong base for their academic and clinical journey ahead.

Key Features

-  **Self-paced with Assignments** : Students can progress through each module independently, completing reflective tasks and skill-building exercises designed for first-year nursing learners.
-  **Year-long Access** : Full access to the entire program for one academic year, allowing students to revisit lessons and reinforce key concepts throughout their first year.
-  **On-campus Mentor Training** : Faculty members or senior students can be equipped to support learners as campus mentors, creating a local guidance ecosystem.
-  **Periodic Live Sessions with Experts** : Interactive sessions with professionals to deepen understanding and bring real-world insight.

CareSteps offers two flexible delivery modes to suit institutional needs and learner preferences:

Mentor-Assisted Learning : Students participate in a structured, in-classroom learning experience guided by a trained campus mentor. This mode blends engaging activity-based sessions with video content, allowing for reflection, discussion, and peer interaction that deepen learning.

Self-Paced Learning : Students independently access video lessons and complete interactive online activities within a stipulated timeframe. This mode offers flexibility while ensuring accountability through built-in progress tracking and reflective assignments.
